

# Club Functional Trainer

Metagenics Fitness Inc.

Our user-friendly and space efficient and full commercial Club Functional trainer is built using Gauge 11 oval shape tubing frame and has a 2:1 ratio that features two stacks of 165 lbs. (75 kg) each with weight plates that are plastic coated to reduce noise.

## Special Feature

The adjustable pulley box features three plastic rollers inside, instead of plastic bushings that allow smoother adjustment and don't require lubrication to move.

## TECHNICAL SPECIFICATIONS

- Space efficient: 1545 mm \* 915 mm (60" \* 36")
- Accessories included: Two adjustable handles, long bar, triceps rope and ankle strap.
- Military grade aircraft steel cables that are flexible and nylon coated for maximum durability.
