

Sound dampening tiles accessories specification:

Transition to avoid a tripping hazard.
Size: 1000 mm Long and 250 mm wide.

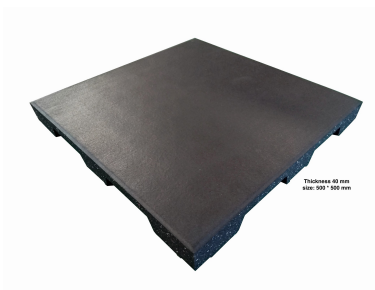

Outside Corner

The underlay shows how the tiles and accessories are connected with each other using the square plastic connectors, which are invisible from the top and give a great look to the installation and finished floor.

The underlay shows the pyramid design that gives minimal point of contact with the concrete to achieve maximum vibration and noise reduction.

Full tile: 500 mm * 500 mm * 40 mm thick that is stiff enough to take strength and cardio equipment apart from free-weights.

Warranty: 5 years
